

The MVP 10, MVP 15, MVP 25, MVP All Asset and other MVP portfolios are managed by Greg Indovina. The above performance data represents the average of all discretionary accounts under management at Accelerate Wealth Advisors, in an amount of \$250,000 or more that was on deposit for the entire period being cited. The performance is based upon the market values of these accounts as of the last calendar day of the period.

Gross returns were calculated on a total return basis, including all dividends interest, accrued income, realized and unrealized gains and losses and do not reflect a deduction of advisory fees, commissions charged on securities transactions or fees for related services. Adjusting for actual fees incurred results in the following “Net of fees” returns:

Name of Portfolio		Name of Portfolio		Name of Portfolio		Name of Portfolio	
Q42013	8.20	Q42013	6.94	Q43013	6/32	Q42013	6.53
1 Year	23.65	1 Year	22.55	1 Year	18.92	1 Year	17.92
3 Year	10.89	3 Year	11.54	3 Year	12.30	3 Year	5.67
5 Year	14.94	5 Year	15.25	5 Year	N/A	5 Year	N/A
10 Year	5.80	10 Year	6.73	10 Year	N/A	10 Year	N/A
ITD	7.00	ITD	6.94	10 Year	15.70	10 Year	12.57

Net of fee calculations also reflect the actual fees deducted from the respective advisory accounts. Dividends are not guaranteed and will fluctuate. Investors should be aware that the net compounded effect of the deduction of fees over time will be affected by the amount of the fee, the time period and investment performance. The Firm’s advisory fees are fully detailed in Part 2A of its Form ADV.

The time-weighted rate of return is the geometric (compounded) return measured on the basis of periodic market valuations of assets. An alternative to the dollar-weighted return measure, the time-weighted return over a certain period depends only on the length of this period and not on the amount invested.

This hypothetical report is not indicative of any security’s performance and is based on information believed to be reliable, although we cannot guarantee its accuracy. Portfolios are individually managed and opened at different times, so no inference should be drawn by present or prospective clients that managed accounts will achieve similar investment performance in the future.

Investment yields will fluctuate with market condition and past performance is not a guarantee of future returns.

The composite returns are being compared to a benchmark for information purposes only. The Firm has chosen this benchmark solely for your information and may require adjustment to correlate with the assets held in your portfolio.

S&P 500 INDEX

The S&P 500 is a market capitalization weighted index of 500 widely held stocks often used as a proxy for the stock market. It consists of 400 industrial, 40 utility, 20 transportation and 40 financial companies listed on U.S. market exchanges. This index does not include the effects of reinvested dividends. TR (Total Return) indexes include daily reinvestment of dividends.

LIPPER GROWTH & INCOME

The Lipper Equity Income Fund Index tracks the financial performance of the 30 largest mutual funds that match “Equity Income” investment category as determined by Lipper. Unlike other indexes, the Lipper index includes the expenses of the mutual funds included in the index.

BARCLAYS INTERMEDIATE GOVERNMENT CORPORATE INDEX

The Barclays Intermediate is an unmanaged index that includes U.S. Treasuries and Agencies and other publicly issued U.S. corporate and foreign debentures and secured notes with maturities between 1 and 9.99 years. This index is the intermediate component of the U.S. Government/Credit Index.

RUSSELL 1000 GROWTH INDEX

The Russell 1000 Indexes are designed to measure the performance of the top 1,000 companies from a universe of the 3,000 largest companies in the U.S. These indexes are capitalization-weighted and include only common stocks belonging to corporations domiciled in the U.S. and its territories and traded on the NYSE, NASDAQ or the AMEX. The Russell 1000 Growth Index measures the performance of those Russell 1000 companies with higher forecasted growth values.
